ABSTRACT

This study aims at studying the needs of public's participation for landscaping the landscape around the canal and ancient town wall in Roi-Et Municipality, Roi- Et Province. The sample of the study consisted of 278 people, The study instrument was questionnaire with a reliability level at 0.86 . The statistic used frequency, percentage, mean and standard deviation.

The results of the study were as follows:

The overall of three aspects for the needs of public's participation for landscaping the landscape around the canal and ancient town wall in Roi-Et Municipality, Roi- Et Province was moderated, ranking from the highest to the lowest; operating, auditing and planning respectively.

The public's suggestion for planning aspect; communities meeting should be considered before projects operating, possibility and worth should be evaluated first and the questionnaires should be distributed to the public and their suggestion from the questionnaires must be considered for planning. The operating aspect; the public information should be published previously, the communities sight projects should be ran by the municipality and the municipality staffs should show their sincere, and the projects that the municipality office supplied for the communities were not appropriate benefit for them. The auditing aspect; the projects' detail should be informed to the public and the public's satisfaction should be evaluated habitually.
