ABSTRACT

The objectives of this research are: 1) to develop Project Borrowing System of Students in Information Technology Program; 2) to find the quality of Project Borrowing System of Information Technology Program. The target group of this research was a group of experts on computer and technology who were able to evaluate this Project Borrowing System of Information Technology Program. They were three instructors of Rajabhat Mahasarakham University with the following qualifications: graduated in Master Degree or Doctorate Degree in Information Technology Program or other programs related to computer. Tools used in this research were Project Borrowing System of Students in Information Technology Program and Evaluation Form on Quality of Project Borrowing System of Students in Information Technology. Statistics used for analyzing data were mean (\bar{x}) and Standard Deviation (S.D.)

The results showed that

1. Project Borrowing System of Students in Information Technology Program was able to be operated with good quality.
2. The overall evaluation on quality conducted by three experts towards Project Borrowing System of Students in Information Technology Program was in high level ($\bar{x} = 4.63$, S.D. = 0.25)
