ABSTRACT

The objective of this study project. 1) To the development Systems Research Journal, Faculty of Information Technology Rajabhat Maha Sarakham University. 2) To assess the quality of research journal Systems Faculty of Information Technology Rajabhat Maha Sarakham University. 3) To find satisfaction of users Systems Research Journal, Faculty of Information Technology Rajabhat Maha Sarakham University. The population is 4th year students major Information Technology 90 people. The representative sample is 4th year students major Information Technology 30 people. Study tool include 1) Systems Research Journal, Faculty of Information Technology Rajabhat Maha Sarakham University.2) A quality assessment Systems Research Journal, Faculty of Information Technology Rajabhat Maha Sarakham University. 3) Assessment of satisfaction Systems Research Journal, Faculty of Information Technology Rajabhat Maha Sarakham University.2) A quality assessment Systems Research Journal, Faculty of Information Technology Rajabhat Maha Sarakham University. The statistics used to analyze data is the average $\bar{X}$ and standard deviation S.D.

The results of the study showed that

      1. Systems Research Journal, Faculty of Information Technology Rajabhat Maha Sarakham University can be used practically.

      2. The results of expert assessment 3 person divided into 4 parts. The result was good. ($\bar{X}$= 4.34, S.D. = 0.59)

      3. The assessment of satisfaction users systems from representative sample 30 people. The evaluation was of satisfaction at a good level. ($\bar{X}$= 4.34, S.D. = 0.73)
