ABSTRACT

The purposes of this research were these : 1) to develop development system payment through technology PayPal 2) to evaluate the quality of developed development system payment through technology PayPal 3) to evaluate the satisfaction of users who used development system payment through technology PayPal. Research population and sample was students studying at the Development system payment through technology PayPal under the Faculty of Information Technology, Rajabhat Maharakham University. Research instruments were development system payment through technology PayPal, an evaluation from of the quality of development system payment through technology PayPal, and an evaluation from of the satisfaction of users who used development system payment through technology PayPal. Statistical methods used for analyzing data were mean and standard deviation.

Research results revealed the following :

1. The Development system payment through technology PayPal was practical and efficient.
2. The Result of quality evaluation of the development system payment through technology PayPal by the experts was at a high level. (\bar{X} = 4.93, S.D. = 0.12)

3. The result of the satisfaction of users who used the development system payment through technology PayPal was at the highest level. (\bar{X} = 4.43, S.D. = 0.02)

Concluded of the study can bring development system payment through technology PayPal is developed. To use it effectively.
